OmniRed Compound Fertiliser

Potassium is an important mineral for all fruiting crops especially in the final stages of fruit development. It is essential for sugar transfer, fruit quality and taste, as well as oil development in nut crops such as macadamias. OmniRed has been specifically tailored for situations such as these and crop timings requiring lower phosphorus and higher potassium.

As with all Omnia compound fertilisers OmniRed is a high quality granule containing nitrogen, phosphorus, potassium plus trace elements. OmniRed is perfect for fruit finishing, macadamia side-dressing, later side-dressing in potatoes, and for certain soils where phosphorus is excessive.

OmniRed is available in 25Kg & 1200Kg bags.

10-2-(20) + 0.1B + 0.25 Zn (SOP Base)

Item	Specification wt. %
T-N (Total Nitrogen)	10.0 Min
U-N (Urea Nitrogen)	8.6 Min
A-N (Ammonium Nitrogen)	1.4 Min
Total P	2.0 Min
Citrate soluble P	1.91 Min
Water soluble P	1.7 Min
Water soluble K	20.0 Min
Boron (B)	0.1 Min
Zinc (Zn)	0.25 Min
Sulphur (S)	8.0 Min
Particle size (2-4 mm)	90.0 Min
Color - Red
