KAMAB 26

FLUID COMPOUND MINERAL FERTILIZER

Adriatica

GUARANTEED ANALYSIS		%W/V
TOTAL NITROGEN	(N)	15%
Nitric Nitrogen	(N)	15%
POTASSIUM	(K)	6.2%
CALCIUM	(Ca)	10.7%
MAGNESIUM	(Mg)	1.8%
BORON	(B)	0.15%
SULPHUR	(S) total	0.72%
Free Amino Acids		0.52%

(Cal) <0.5mg/kg; Arsenic (As) <0.5mg/kg Lead (Pb)< 1.5mg/kg; Mercury (Hg)<0.5mg/kg

DOSES AND INSTRUCTIONS FOR USE

FOR LEAF APPLICATION: the choice of dosage (changeable from 3-4 L/Ha) is subordinated to different factors and it can be, in case of need, increased or reduced, according to the phenologic stage and to the seriousness of the deficiency of crops. The minimum dosage can be used in any case on crops at early stages. All applications can be repeated up to end of such symptoms. VINE: Prevents and treats of rachis and grapes drying; **TOMATO:** Prevents and treats apical deterioration of fruit; **APPLE:** Prevents and treats bitter pit; **STRAWBERRY** Increases fruit consistency reducing deterioration; **POTATO:** Prevents leaf deficiency; **CHERRY** Prevents fruit split **WATER-MELON:** Speeds up and increases fruits size; **MARROW** Increases a qualitative and quantitative production of the plant; **MELON:** Prevents and treats leaf and petioles drying; **AUBERGINE, PEPPER:** Prevents leaf and fruit malformations; **SALAD, ENDIVE, SCAROLA, LETTUCE:** Prevents and treats leaf drying; **FENNEL, CELERY, CHICORY** Prevents and treats the black both in the centre and petioles. **BLUEBERRY** improves fruits firmness.

APPLICATION: On green grapes apply 3 applications one week apart, finishing one week before harvest. In all varieties start 1st application at beginning of berry softening (verasion). Recommended dose is 4 L/ha. Don't mix the product with oils, Sulphur, and prod with high alkalinity. Use low water volumes and small droplet size late in the season.

INSTRUCTIONS The product is stable if it is kept at temperature between +4°C and +32°C. Don't keep the product exposed to sun. Shake it from time to time and homogenize it well before using. In case of leak, absorb with sand and recycle according to local law.

WARNINGS Apply applications in the coolest hours of the day especially in greenhouses. If you mix the product with other formulas, preliminary tests are recommended for the first time.

GUARANTEES The manufacturer's responsibility is limited only to the supply of the controlled products when sold and in conformity with the composition indicated on the pelage and sold in the original package. The manufacturer cannot be considered liable for the incorrect use or for any damage caused by weather events, soil nature, crop sensitivity, cultivation methods, etc. Besides the manufacturer can supply on demand the analytical procedure for the analysis of each element as guarantee of composition.

CHARACTERISTICS

KAMAB26 is a very high purity fertilizer, especially formulated to solve different diseases causing dehydration, yellowing and necrosis, due to Ca, K, Mg and B deficiencies. Thanks to its liquid formulation **KAMAB 26** prevents and treats directly and immediately such symptoms. It has a high rate of absorption through root and leaves of plants: within two hours if the application is through leaves. This high absorption capacity gives the opportunity to obtain, in a short time, very good results in the prevention and control of the nutritional diseases especially in case of rachis drying in vine and in tomato apical deterioration. It also carries high healing power against possible micro lesions because of pesticide applications or weather adversities (wind, rain and hail). Because it includes immediately available calcium, **KAMAB 26** provides greater resistance to Botrytis cinerea in table grapes and vegetables, and improves the cellular turgidity and preservability during transport for a longer distance.
Calcium, in synergy with the other elements that are in KAMAB 26, determines a better strength of the cell-walls, controls the absorption processes of nitrogen and iron and neutralizes excessive organic acids.
