TECHNICAL DATA SHEET

GREENSEAL®

WOUND DRESSING

PRODUCT CATEGORY

Pruning Wound Dressing

APVMA Approval Number: 61873/134299

ANALYSIS:

Analysis:
Active Constituent: 10g/L TEBUCONAZOLE

KEY BENEFITS:

- Seals off pruning and grafting wounds or damage, for the control of *Eutypa* dieback of grapevines, *Botryosphaeria* (caused by *Diplodia seriata*) and *Eutypa* dieback of almonds and silver leaf on apples and cherries
- Provides a flexible but hard, physical barrier against airborne spore entry.
- Ready-made, easy, refillable applicator.
- Assists in the plants natural healing process by promoting wound "callus" formation.

DIRECTIONS FOR USE

RESTRAINTS

DO NOT thin with water, as the product will not provide adequate coverage.

DO NOT apply to wounds showing excessive brown staining.

DO NOT allow product to freeze.

Shake or stir well before use.

Apply only during the dormant winter period on fresh pruning cuts.

Apply thickly to dry wound surface with a paint brush or applicator brush on the same day as the pruning cut is made.

Apply on fine, sunny or windy days – avoid applying on wet, foggy days as the product may not dry for some time.

Wash brushes and applicators in water after use.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

WITHHOLDING PERIOD NOT REQUIRED WHEN USED AS DIRECTED

FUNGICIDE RESISTANCE WARNING GROUP 3 FUNGICIDE

Greenseal is a member of the DMI group of fungicides. For fungicide resistance management the product is a Group 3 fungicide. Some naturally occurring individual fungi resistant to the product and other Group 3 fungicides may exist through normal genetic variability in any fungal population. The resistant individuals can eventually dominate the fungal population if these fungicides are used repeatedly. These resistant fungi will not be controlled by this product and other Group 3 fungicides, thus resulting in a reduction in efficacy and possible yield loss. Since the occurrence of resistant fungi is difficult to detect prior to use, Omnia Specialities Australia Pty Ltd accepts no liability for any losses that result from failure of this product to control resistant fungi.

Re-entry Period

DO NOT allow entry into treated areas until the dressing has dried, unless wearing cotton overalls buttoned to the neck and wrist (or equivalent clothing) and elbow-length chemical resistant gloves. Clothing must be laundered after each day's use.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

DO NOT contaminate ponds, watercourses and drains with this product or used container.

STORAGE AND DISPOSAL

Store in the original container in a cool, well-ventilated area. DO NOT store for prolonged periods in direct sunlight. Triple rinse containers before disposal. Dispose of rinsings in a disposal pit specifically marked and set up for this purpose, clear of waterways, desirable vegetation and tree roots. DO NOT dispose of undiluted chemicals on site. If recycling, replace cap and return clean containers to recycler or designated collection point. If not recycling, break, crush, or puncture and deliver empty packaging for appropriate disposal to an approved waste management facility. If an approved waste management facility is not available, bury the empty packaging 500mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, desirable vegetation and tree roots, in compliance with relevant Local, State or Territory government regulations. DO NOT burn empty containers or product.

TYPICAL CHEMICAL CHARACTERISTICS:

pH:	-
Colour:	Green
Form:	Liquid
Odour:	Characteristic
Density @ 20°C:	1.06 g/cm^3
Solubility in Water:	Not miscible or difficult to mix

PACKAGING SIZES AVAILABLE:

2 L, 10 L

IDEAL STORAGE CONDITIONS:

Store in cool and dry conditions (Preferably below 30°C)
